ENGAGEMENT

A

Engaged employees have a sense of personal attachment to their work and organisation; they are motivated and able to give their best to help the organisation succeed.

The complete list of questions which are used to calculate the Engagement Index are listed in the All Questions pages.

RESPONSE RATE

Due to the size of the NSW public sector, even comparatively low levels of response to People Matter can be statistically representative and an accurate reflection of perceptions. Any parts of the sector where the response rate is too low for data to be fully reliable have been flagged in reports.

Some entities exceeded 100% where responses were greater than the employee headcount. This is thought to be primarily due to employees selecting the wrong work location in the survey.

QUESTION HEADLINES

HIGHEST AGREEMENT SCORING QUESTIONS

2016 AGREEMENT %

| 1h. | I look for ways to perform my job more effectively | 95% |
|-----|---|-----|
| 1a. | I understand what is expected of me to do well in my role | 89% |

TAKING ACTION

WHAT'S NEXT?

Sector employees have now given their feedback and these results show where actions and improvements are required.

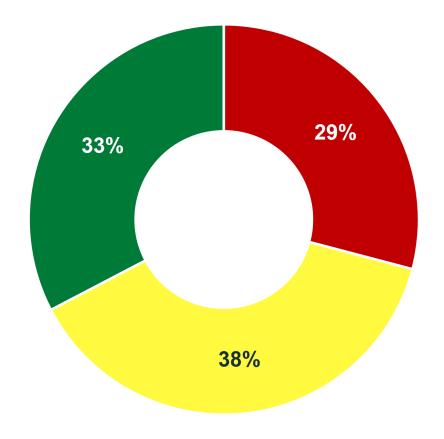

Research has shown that a key reason why employees can become disengaged is if they are asked their opinion and then no action takes place as a result.

of employees replied favourably to:

'I believe action will be taken on the results from this survey by my organisation.'

Responses from individual employees are confidential and strict rules are in place to safeguard privacy at every stage of the survey process.

There is no way of tracing individuals in reports or through the de-identified survey data. There are limits on the size of workgroups that can be reported (10 or more employees) and responses from demographic groups (30 or more employees). Where people work in small teams, the results are merged with larger business units and results are not available. Where this happens an 'r' is shown in reports.

HOW TO READ THIS REPORT

The majority of questions have a 5-point answer scale. In reports, the Strongly Agree and Agree scores are combined to create an agreement (or positive) score which is shown as a rounded percentage.

Previous surveys had a 4-point answer scale, which means that comparisons are limited for this year only. Some scales, such as those used for the Engagement Index, are unchanged.

| Strongly Agree | Agree | Nei Agre Disa | e nor | Disagree | Strongly Disagree | |
|-------------------|-------|---------------------|------------------------|----------|----------------------|--|
| Agreement | | Agre | ther e nor igree | Disaç | greement | |

HOW THE DRIVERS AND INFLUENCERS ARE DERIVED

ORC International employs SPSS software to fully interrogate the results and perform appropriate calculations. Our statisticians need a minimum of **30 responses** from a team to perform the analysis to determine the top influences of engagement, leadership and other key question groups.

Statistical techniques applied for this analysis include **Factor Analysis** which identifies patterns in data and allows the statistician to assess whether the attitude questions are measuring the same underlying theme or characteristic.

Regression Analysis then involves building a statistical model based on research that employee engagement is affected by various elements of the workplace such as line manager, learning & development, reward and recognition, job role, etc. This analysis assigns importance weights to the attributes that have been measured. It relies on certain assumptions, one of which is that the variables used in the model should, by definition, not be strongly related to each other. The outcome of these techniques is a list of questions which we can say have the highest association with the engagement index, or more simply, are the most significant influencers of employee engagement

ROUNDING

Results are presented as whole numbers for ease of reading, with rounding performed at the last stage of the calculation for maximum accuracy.

Values from .00 to .49 are rounded down, whereas values from .50 to .99 are rounded up. Therefore, in some instances the data will not add up to 100%. Example below:

| | Strongly Agree | Agree | Neither | Disagree | Strongly Disagree | Total |
|---------------------|-------------------|--------|---------|----------|----------------------|-------|
| NUMBER OF RESPONSES | 151 | 166 | 176 | 96 | 24 | 613 |
| PERCENTAGE | 24.63% | 27.08% | 28.71% | 15.66% | 3.92% | 100% |
| ROUNDED PERCENTAGE | 25% | 27% | 29% | 16% | 4% | 101% |
