# Headline results for key topics

These are the % favourable scores for key survey topics. Each topic relates to an area of employee experience.

We've flagged the top 3 (\*) and bottom 3 (!) topics for you. Use these topics as a starting point for exploring your results.

# Highest and lowest questions

These are the questions with the highest and lowest % favourable scores. % favourable is based on the respondents who selected 'strongly agree' or 'agree'.

Employee engagement is about a person's connection to their organisation. It is a global measure of employee experience.

Many factors influence engagement: leadership, a positive and inclusive work culture, manager support, accountability and flexible work to name a few.

# Role clarity and support

## Purpose and direction

An employee has role clarity when they understand their goals, how to achieve these goals, and how the goals link to broader strategy.

Even when an employee does have role clarity, they need the right support to deliver. Support can come in the form of time, tools and technology, and training.

				2021 % favourable	difference from 2019	difference from Sector	difference from Cluster

Decision making is the process of making choices by identifying a decision, gathering information, and assessing alternative resolutions.

Accountability is one of the four core NSW public sector values. It is about taking responsibility for decisions and actions. Accountability can add meaning to work and foster engagement.

To improve employee experience, leaders at all levels should take on board employee feedback and act on the survey results.

Employees can become disengaged if they are asked their opinion and then no action takes place as a result.

## **Additional information about the survey**

**Discover more about how the survey works and how to act on results**

# Survey model

The People Matter Employee Survey provides an important opportunity for almost 400,000 people to have a say about their workplace and to help make the public sector a better place to work.

The survey asks employees about their experiences with their work, workgroup, managers, and organisation. Their experiences are grouped into management practices and reported under 4 domains:

- Purpose and direction
- Work environment
- Enabling practices
- Leadership

All of these practices positively contribute towards employee and organisational outcomes, including employee engagement, job satisfaction, wellbeing, and customer service.

## Privacy

Responses from individual employees are confidential. Strict rules protect privacy at every stage of the survey process. These reports only show the results for a group of employees (i.e. a workgroup or demographic group) when there are 10 or more responses for the group.

## % favourable calculation

Most scores are shown as % favourable, which is the sum of the 'strongly agree' and 'agree' percentages.

% favourable scores are colour coded based on these ranges:

## Difference scores

Difference scores are shown where available. Differences are colour coded based on these ranges:

Generally, topic level comparisons are not shown when less than 50% of the questions are comparable.

## Rounding

Results are presented as whole numbers for ease of reading. Values are rounded down if their first decimal number is less than 5. Values are rounded up if their first decimal number is equal to or greater than 5. Due to rounding, results will not always add up to 100%. Difference scores may appear to be slightly different to values derived from subtracting rounded numbers, usually within 1%.

## Employee engagement score calculation

Each person who answered all five employee engagement questions gets an employee engagement score. Each answer is assigned a score as follows:

- 100 to 'strongly agree'
- 75 to 'agree'
- 50 to 'neither agree nor disagree'
- 25 to 'disagree'
- 0 to 'strongly disagree'

The employee's engagement score is calculated as the average of the 5 question scores. Employees' scores are then averaged to calculate a team or organisation engagement score.

## Key driver analysis

Experience tells us that a successful response to survey results requires focus on key priorities. The key driver analysis, which uses statistical techniques including Pearson's correlation analysis, identifies individual questions with the strongest influence on your employee engagement score.

Key drivers are split into strengths (high correlation, high score) and priorities (high correlation, low score). You are recommended to look for ways to maintain your strengths and improve your priority areas.

# Action planning

We are all responsible for building a world class public service. Improving employee experience is a way to work towards this goal.

**Survey communication and action planning:** Leaders are encouraged to share and discuss survey results with employees, and start thinking about actions using the template below. In addition to PMES results, you should consider work context and internal business data (e.g. turnover data). You should implement and monitor your plan, either on its own or as part of a broader organisational improvement strategy.
