ENGAGEMENT

Engaged employees have a sense of personal attachment to their work and organisation; they are motivated and able to give their best to help the organisation succeed.

The complete list of questions which are used to calculate the Engagement Index are listed in the All Questions pages.

RESPONSE RATE

Due to the size of the NSW public sector, even comparatively low levels of response to People Matter can be statistically representative and an accurate reflection of perceptions. Any parts of the sector where the response rate is too low for data to be fully reliable have been flagged in reports.

Some entities exceeded 100% where responses were greater than the employee headcount. This is thought to be primarily due to employees selecting the wrong work location in the survey.

QUESTION HEADLINES

HIGHEST AGREEMENT SCORING QUESTIONS

2016
AGREEMENT %

1h. I look for ways to perform my job more effectively	97%
1a. I understand what is expected of me to do well in my role	93%
1d. I feel I make a contribution to achieving the organisation's objectives	89%
8i. Diversity and inclusion in the workplace can contribute to better business outcomes	88%
2a. My workgroup strives to achieve customer/client satisfaction	87%
7c. My organisation strives to earn and sustain a high level of public trust	87%
2i. People in my workgroup treat customers/clients with respect	86%
7b. My organisation strives to match services to customer/client needs	84%
7d. My organisation focuses on improving the work we do	84%
1g. My job gives me a feeling of personal accomplishment	83%

LOWEST AGREEMENT SCORING QUESTIONS

2016
AGREEMENT %

15. I believe action will be taken on the results from this survey by my organisation	25%
3k. I would like to work in another agency within the NSW Public Sector during my career	31%
7l. My organisation's processes for recruiting employees are efficient	37%
7m. Recruitment and promotion decisions in this organisation are generally fair	43%
1l. My workload is acceptable	45%
5n. My manager appropriately deals with employees who perform poorly	45%
6h. I feel that senior managers listen to employees	48%
8j. How satisfied are you with your ability to access and use flexible working arrangements?	48%
4a. I am paid fairly for the work I do	49%
3j. I am satisfied with the opportunities available for career development in my organisation	49%

YOUR PEOPLE MATTER QUESTION RESULTS AT A GLANCE

These are your highest and lowest scoring questions from the survey, based on respondents who have selected 'Strongly Agree' and 'Agree'.

ALMOST 27,500 EMPLOYEES ACROSS EDUCATION TOOK THE OPPORTUNITY TO HAVE THEIR SAY IN PEOPLE MATTER

The People Matter employee survey was open to all employees in Education between 2nd and 31st May 2016. Almost 27,500 employees took the opportunity to have their say, resulting in a 35% response rate. This level of response is sufficient for the analysis of data across Education to be robust and representative.

Within Education, employee engagement was indexed at 69% which is above the sector average (65%) and also an improvement from the 2014 score (67%).

Employee engagement with organisations is lower than engagement with work. An observable finding across Education and indeed the sector is that employees are more positive about their immediate working environment and team, with positivity declining when focus shifts to their managers, their senior managers and their organisations. Within Education, the strongest drivers of engagement were collaboration between teams, capability, effectiveness of change management and performance development.

Compared to the sector average, perceptions of senior managers was a comparatively strong performing area for Education as the overall aggregated agreement score was well above average. However there was a significant difference between scores for Education offices (47%) compared with Public Schools (57%). Results also revealed that there is a clear distinction between perceptions of senior managers and direct managers however this is a common trend across the sector, particularly with regard to the lower performing areas such as change management and communication.

Communication is an enabler for high performance and Education scored higher than the sector average for this question group with 63%. Perceptions of how immediate managers communicate were stronger than perceptions of communication by senior managers, a common finding across the sector.

Effective, strong and visible leadership is not just essential in steering Education through change but also in realising a high performance culture to enable better business outcomes. Education perceptions about high performance were broadly positive particularly with regards to employees understanding their job expectations and having the appropriate skills to perform in their jobs. However, there was less positivity when it came to collaboration and innovation and also less certainty with recruitment activities where capable people are selected to do the job.

The public sector values of integrity, trust, service and accountability guide the high standards required of employees. Survey results demonstrate high agreement with aspects of service delivery, which rates highest among the four values, while less positive scores are seen within integrity.

The majority of respondents in Education agreed that diversity and inclusion in the workplace can contribute to better business outcomes. Younger employees in particular were positive about diversity.

This report focuses on all the key questions groups in People Matter, comparing performance in Education to the sector average and, where possible, providing analysis to demonstrate the themes and areas which are most likely to influence improvements in engagement and other key performance indicators.

The initial overview sections are followed by summary results for all clusters and all agencies in this cluster. The Key Questions section contains cluster results for the individual questions and the aggregate scores for each question group. A profile of respondents and select demographic responses are near the end of the report.

EMPLOYEE ENGAGEMENT

ENGAGEMENT IS IMPROVING

A complete list of the questions which are used to measure Employee Engagement are listed in the All Questions section.

EMPLOYEE ENGAGEMENT	PMES 2016 SECTOR SCORE	65%
	PMES 2014 SECTOR SCORE	65%
	PMES 2014 CLUSTER SCORE	67%

69%

KEY DRIVERS OF ENGAGEMENT

The following questions have been identified through an advanced statistical technique called **Key Driver Analysis** to be the questions with the strongest impact on Employee Engagement.

Focus on improving perceptions on these questions should see an corresponding **impact on the Engagement index**.

KEY DRIVERS OF ENGAGEMENT	% AGREEMENT	% SECTOR
7g. There is good co-operation between teams across our organisation	55%	48%
7n. My organisation generally selects capable people to do the job	55%	51%
7j. My organisation is committed to developing its employees	65%	53%
7f. I feel that change is handled well in my organisation	50%	41%
7e. My organisation is making the necessary improvements to meet our future challenges	71%	62%
7d. My organisation focuses on improving the work we do	84%	76%

EMPLOYEE ENGAGEMENT BY CLUSTER

Employee engagement is a long established and widely deployed business and organisational performance indicator. Definitions vary widely, however one of the most comprehensive studies into engagement by the Engage for Success Taskforce, commissioned in 2009 by the United Kingdom government, concluded that:

“Engaged employees have a sense of personal attachment to their work and organisation; they are motivated and able to give their best to help it succeed – and from that flows a series of tangible benefits for organisation and individual alike”

EMPLOYEE ENGAGEMENT IS HIGH AND ABOVE THE SECTOR AVERAGE AT THE CLUSTER LEVEL

The overall Engagement Index score for Education is 69% which has slightly improved since 2014 (67%). Public Schools scored 69.5% which strongly affected the overall cluster score due to the higher number of respondents from this division. By comparison, Education Offices scored 65% which is in line with the sector average but did not have a great influence on the cluster score due to the lower number of respondents compared with Public Schools.

Greater positivity was evident when respondents were asked about their levels of engagement with their work (83%) compared with their engagement with their organisation. However, Education respondents did score notably higher compared to the sector average when asked if they felt proud to tell others they worked in Education and if they felt a strong personal attachment to their organisation.

Looking across the cluster, engagement levels remain broadly consistent for most business units. Executive Director Ultimo, Executive Director Wagga and School Operations and Performance displayed the highest levels of engagement, all at 70%.

Another interesting trend is noted within engagement by tenure. A typical trend found in engagement research is that levels of engagement for new employees begin high, fall to their lowest after 2-5+ years and recover for very long servers of over 10+ years to higher than average levels. However, this 'U-shaped' pattern is not reflected in the Education data, nor is it evident in the NSW public sector as a whole. Whilst levels of engagement within current roles begin high (75% for less than 1 year of service), the fall experienced with mid-level tenure never recovers, with the longest serving employees of 10+ years remaining amongst the least engaged employees in the cluster, falling to 65% for 20+ years service.

Engagement of respondents based on their level of seniority within Education shows little variance with managers, scoring 71% compared with and non managers at 68%. However, managers score comparatively higher at 75%. This is consistent with salary data with those in the \$170,000-\$229,999 salary band being the most engaged (80%) and those in the \$230,000+ salary band scoring 79%. However, employees earning under \$35,000 also score comparatively higher (75%).

Looking at engagement levels by demographics, there are no significant differences in engagement of Aboriginal and Torres Strait Islander employees, those who identify themselves as LGBTI, those working full or part time or between males and females. However educational attainment did reveal some variance within Public Schools, where respondents with a Doctoral Degree being the least engaged (59%) and respondents with less than year 12 or equivalent educational attainment or at certificate level being the most engaged (75%).

Key driver analysis revealed that co-operation, recruitment and employee development have a significant impact on levels of engagement and were areas which held low positivity. Other key drivers included change management and perceptions about continuous improvement in the workplace.

A breakdown of the questions driving engagement indicate a high level of neutrality in the belief about whether there is good co-operation between teams, that capable people are generally selected to do the job, and that change is handled well where 26% disagree. However, compared to the sector, managing change was an area which performed notably better, as did commitment to developing employees and making necessary improvements.

SENIOR MANAGERS

RESULTS ARE ABOVE THE SECTOR AVERAGE

A complete list of the questions which are used to measure Senior Managers are listed in the All Questions section.

SENIOR MANAGERS	PMES 2016 SECTOR SCORE	47%
	PMES 2016 CLUSTER HIGH	58%
	PMES 2016 CLUSTER LOW	38%

56%

KEY INFLUENCERS

The following questions have been identified through a **statistical correlation analysis** as the questions with the strongest association with the Senior Managers.

Focus on improving perceptions on these questions should see a corresponding **influence on perceptions of the Senior Managers**.

KEY INFLUENCERS	% AGREEMENT	% SECTOR
7j. My organisation is committed to developing its employees	65%	53%
6i. Senior managers in my organisation genuinely support the career advancement of women	64%	54%
7e. My organisation is making the necessary improvements to meet our future challenges	71%	62%
7g. There is good co-operation between teams across our organisation	55%	48%
7d. My organisation focuses on improving the work we do	84%	76%
1f. I am provided with the support I need to optimise my contribution at work	63%	59%

Perceptions of senior managers were one of the lowest scoring areas for Education which is consistent with trends seen across the sector. The aggregated agreement score for this question group was 56% across the cluster but notably lower within Education Offices (47%) and slightly higher within Public Schools (57%). It is not uncommon for leadership questions to return low scores due to the reduced visibility of senior leaders in large and complex organisations. However, despite low positivity being displayed for some items within senior managers, it is encouraging to see that compared to the sector, all items perform notably higher.

More challenging results were noted around perceptions of change management and communication with senior managers as just 48% of respondents feel that senior managers listen to employees and 51% feel senior managers keep employees informed about what's going on.

By tenure in current role, employees with less than 2 years of service held the most positive perceptions. Within Education Offices, this declined from 58% for less than 1 year service to 29% for more than 20 years service. Public Schools also experienced a similar downward trend with agreement dropping from 68% for less than 1 year service to 51% for more than 20 years service.

Amongst different demographic groups, there were no significant differences about perceptions of senior managers by gender, Aboriginal and Torres Strait Islander or LGBTI employees. However, managers of other managers were notably more positive about their performance compared with non-managers, as were senior executives.

KEY INFLUENCERS

Career development is strongly associated with perceptions of leadership in Education, with 65% of respondents answering that they believe the organisation is committed to developing staff, an area that performed notably above the sector average. 64% agree that senior managers also specifically support the career advancement of women, also notably above the sector average.

Statistical correlation analysis revealed significant overlap between what influences perceptions of leadership and what drives engagement, particularly when it came to employee development, continuous improvement and co-operation between teams. This re-enforces the importance of investing effort in employees and that effective change management skills are essential to leadership within Education. Feeling supported and nurtured within the organisation also affected how Education respondents perceive senior managers.

RESULTS ARE ABOVE THE SECTOR AVERAGE

A complete list of the questions which are used to measure Communication are listed in the All Questions section.

COMMUNICATION 63%	PMES 2016 SECTOR SCORE	59%
	PMES 2016 CLUSTER HIGH	70%
	PMES 2016 CLUSTER LOW	51%

KEY INFLUENCERS

The following questions have been identified through a **statistical correlation analysis** as the questions with the strongest association with the Communication.

Focus on improving perceptions on these questions should see a corresponding **influence on perceptions of the Communication**.

KEY INFLUENCERS	% AGREEMENT	% SECTOR
5d. My manager listens to what I have to say	76%	73%
5h. My manager takes into account the differing needs and circumstances of employees when making decisions	68%	65%
5j. I have confidence in the decisions my line manager makes	69%	67%
5i. My manager would take appropriate action if decision-making processes were found to be biased	67%	64%
5m. My manager provides acknowledgement or other recognition for the work I do	71%	67%
5k. My manager treats employees with dignity and respect	78%	76%

Empowering and connecting with employees through communication is vital to successful organisations. Across Education, questions regarding communication averaged 63% agreement which is four percentage points higher than the sector average. Differences were particularly evident between Education Offices and Public Schools when it came to communication with senior managers and being kept informed (44% compared to 52%) and listening to employees (40% compared to 49%). Schools Operations and Performance performed particularly well (68%) compared to other business units.

When comparing communication between managers and senior managers and employees within Education, a notably higher proportion are more positive about managers than senior managers, with 72% believing managers communicate effectively and 72% also feeling managers encourage and value employee input.

When it came to feeling able to speak up to share a different view, Education Offices were more positive than schools (71% compared to 67%).

There were no significant differences between gender, ATSI, LGBTI employees, or employees who speak another language other than English at home.

KEY INFLUENCERS

Analysis to identify the biggest influencers on communication highlighted the importance of effective listening and the way that employees feel treated by their managers. 76% felt managers listen to what employees have to say and 68% feel managers take differing needs into account when making decisions. Strong leaders and managers understand that each individual and member of their team is different and requires different ways of working.

RESULTS ARE ABOVE THE SECTOR AVERAGE

A complete list of the questions which are used to measure High Performance are listed in the All Questions section.

HIGH PERFORMANCE	PMES 2016 SECTOR SCORE	68%
	PMES 2016 CLUSTER HIGH	73%
	PMES 2016 CLUSTER LOW	61%

73%

KEY INFLUENCERS

The following questions have been identified through a **statistical correlation analysis** as the questions with the strongest association with the High Performance.

Focus on improving perceptions on these questions should see a corresponding **influence on perceptions of the High Performance**.

KEY INFLUENCERS	% AGREEMENT	% SECTOR
1f. I am provided with the support I need to optimise my contribution at work	63%	59%
7j. My organisation is committed to developing its employees	65%	53%
5f. My manager encourages and values employee input	72%	69%
5e. My manager communicates effectively with me	72%	69%
5g. My manager involves my workgroup in decisions about our work	68%	64%
5h. My manager takes into account the differing needs and circumstances of employees when making decisions	68%	65%

High Performance has been described as the consistent achievement of increased productivity through the setting of rigorous goals, targets and priorities, all of which are aligned across the organisation. Six separate factors and 21 questions were used to measure high performance in People Matter. The aggregate score for high performance was 73% within Education which is five percentage points above sector average. Education Offices scored notably lower at 67% compared to Public Schools which scored 74%.

High Performance survey questions centred around six key themes: capability, efficiency, continuous improvement and innovation, collaboration and outcomes.

Capability questions aimed to assess perceptions about work skills. Education capability questions collectively scored 68% agreement which is slightly above the sector average. 78% agree that the people that they work with have the appropriate skills to do their job well, however perceptions were less positive regarding the belief that the organisation selects capable people to do the job with just 55% agreement.

Efficiency and effectiveness were evaluated by asking whether correct information and resources were in place to allow employees to deliver outcomes efficiently and by understanding what is expected of employees. The aggregated agreement score was 71%, three percentage points below the sector average. 15% of respondents disagreed when asked if they have the tools to do their job effectively and 13% disagreed when asked if they get the information needed to do their job well.

Continuous Improvement and Innovation questions explored whether employees perceived Education to be an organisation which is future and improvements focused and encouraging of innovation ideas. These question groups scored 75% and 66% respectively. Managers were notably more positive about continuous improvement (73%) compared to non managers (66%) within Education Offices. A high proportion (84%) agreed that their organisation focuses on improving the work that it carries out.

Collaboration questions asked how well employees collaborate within and between teams as well as the promotion of external collaboration by senior managers. Education collectively scored 65% agreement for this question group which is six points above the sector average. Although 77% agreed their team works collaboratively, only 55% believed there is good co-operation between teams, a trend seen across the sector.

Outcomes questions looked at achievement of organisational objectives and business outcomes. Education returned a result of 89% agreement which was four percentage points above sector average.

KEY INFLUENCERS

Analysis revealed that perceptions about workplace support and employee development strongly influenced high performance scores. Responses about commitment to employee development and levels of management communication with employees were above sector average.

PUBLIC SECTOR VALUES

RESULTS ARE ABOVE THE SECTOR AVERAGE

A complete list of the questions which are used to measure Public Sector Values are listed in the All Questions section.

PUBLIC SECTOR VALUES	PMES 2016 SECTOR SCORE	66%
	PMES 2016 CLUSTER HIGH	74%
	PMES 2016 CLUSTER LOW	59%

71%

KEY INFLUENCERS

The following questions have been identified through a **statistical correlation analysis** as the questions with the strongest association with the Public Sector Values.

Focus on improving perceptions on these questions should see a corresponding **influence on perceptions of the Public Sector Values**.

KEY INFLUENCERS	% AGREEMENT	% SECTOR
5j. I have confidence in the decisions my line manager makes	69%	67%
7j. My organisation is committed to developing its employees	65%	53%
5f. My manager encourages and values employee input	72%	69%
6b. I feel that senior leaders effectively lead and manage change	53%	43%
5h. My manager takes into account the differing needs and circumstances of employees when making decisions	68%	65%
5e. My manager communicates effectively with me	72%	69%

PUBLIC SECTOR VALUES

The core values of Integrity, Trust, Service and Accountability were measured using 22 survey questions. Overall, Education had an aggregate agreement score of 71% which is five points above the sector average. All values for Education were marginally above the sector average, except for accountability which was seven percentage points above average.

Integrity was measured by questions related to employees being open and honest, managers and leaders modelling the behaviours expected and policies and procedures being in place to ensure there are no conflicts of interest. Positively, 67% indicated that they believed their colleagues to be open, honest and transparent. Striving to earn public trust and treating customers/clients with respect were rated highly (87% and 86% agreement respectively).

Service questions are concerned with customer needs and service quality. A high proportion of respondents (87%) agreed that their workgroups strive to achieve customer and client satisfaction and that their organisation strives to match customer and client needs (84%). 65% felt that senior managers communicate the importance of customers and this was notably lower for those in service delivery roles without direct contact with the public (57%) and in research roles (49%).

Accountability questions relate to efficiency and continuous improvement. High neutral perceptions are seen for people taking responsibility for their actions (27%), with just over half (54%) of respondents agreeing with this question.

By seniority, managers were more positive on integrity than non managers (68% compared to 60%) and managers of other managers were higher again (74%). A similar trend was evident when looking by salary, where agreement was higher in those earning \$110,000 or more.

DIVERSITY & INCLUSION

RESULTS ARE ABOVE THE SECTOR AVERAGE

A complete list of the questions which are used to measure Diversity & Inclusion are listed in the All Questions section.

DIVERSITY & INCLUSION	PMES 2016 SECTOR SCORE	67%
	PMES 2016 CLUSTER HIGH	75%
	PMES 2016 CLUSTER LOW	61%

69%

KEY INFLUENCERS

The following questions have been identified through a **statistical correlation analysis** as the questions with the strongest association with the Diversity & Inclusion.

Focus on improving perceptions on these questions should see a corresponding **influence on perceptions of the Diversity & Inclusion**.

KEY INFLUENCERS	% AGREEMENT	% SECTOR
5e. My manager communicates effectively with me	72%	69%
5g. My manager involves my workgroup in decisions about our work	68%	64%
5j. I have confidence in the decisions my line manager makes	69%	67%
5o. My manager ensures fair access to developmental opportunities for people in my workgroup	67%	62%
5m. My manager provides acknowledgement or other recognition for the work I do	71%	67%
5k. My manager treats employees with dignity and respect	78%	76%

The concepts of workplace diversity and inclusion encompass physical and cultural differences among employees, recognition of differences in working styles and approaches as well as involvement and empowerment, where the inherent worth and dignity of all people are treated as paramount. A total of 11 questions focused on diversity and inclusion in People Matter. Overall, Education responses to these questions were broadly positive, with an aggregated agreement score across all items of 69%, two points above the sector average.

88% of respondents agreed that diversity and inclusion in the workplace can contribute to better outcomes. Around three quarters of respondents agreed their manager listens to what they have to say (76%) and that their organisation respects individual differences (78%), however fewer respondents (68%) felt that they are able to speak up and share different views.

There were no significant differences between the aggregate score of Aboriginal or Torres Strait Islander respondents and the cluster average and encouragingly, employees aged 20-24 showed the highest agreement (82%). Within Education Offices, only 57% agreed that senior managers genuinely support the career advancement of women.

Just 48% of Education employees reported being satisfied with their ability to access flexible working arrangement, with a higher degree of positivity within Education Offices (65%). However, this is reflective of the operational environment within Education which may restrict the extent of flexible working more than other parts of the sector.

KEY INFLUENCERS

Statistical correlation analysis has revealed that perceptions about direct managers influence opinions about diversity and inclusion in the workplace since the top six key influencing questions were related to direct manager behaviours such as communicating effectively, involving workgroups in decisions, treating employees with dignity and respect, and acknowledging employee's work. These scores were all above the sector average.

EXPLORE THE RESULTS FOR DIFFERENT GROUPS OF EMPLOYEES

The Engagement score is weighted. It cannot be compared with other scores which are the average of % agreement results for all questions in each group.

Differences have been highlighted where they are 5 or more % points above or below the scores in the first column.

GUIDE TO THIS REPORT

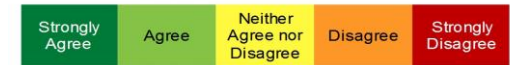

i ANONYMITY RULES

Responses from individual employees are confidential and strict rules are in place to safeguard privacy at every stage of the survey process.

There is no way of tracing individuals in reports or through the de-identified survey data. There are limits on the size of workgroups that can be reported (10 or more employees) and responses from demographic groups (30 or more employees). Where people work in small teams, the results are merged with larger business units and results are not available. Where this happens an 'r' is shown in reports.

i HOW TO READ THIS REPORT

The majority of questions have a 5-point answer scale. In reports, the Strongly Agree and Agree scores are combined to create an agreement (or positive) score which is shown as a rounded percentage.

Previous surveys had a 4-point answer scale, which means that comparisons are limited for this year only. Some scales, such as those used for the Engagement Index, are unchanged.

i HOW THE DRIVERS AND INFLUENCERS ARE DERIVED

ORC International employs SPSS software to fully interrogate the results and perform appropriate calculations. Our statisticians need a minimum of **30 responses** from a team to perform the analysis to determine the top influences of engagement, leadership and other key question groups.

Statistical techniques applied for this analysis include **Factor Analysis** which identifies patterns in data and allows the statistician to assess whether the attitude questions are measuring the same underlying theme or characteristic.

Regression Analysis then involves building a statistical model based on research that employee engagement is affected by various elements of the workplace such as line manager, learning & development, reward and recognition, job role, etc. This analysis assigns importance weights to the attributes that have been measured. It relies on certain assumptions, one of which is that the variables used in the model should, by definition, not be strongly related to each other. The outcome of these techniques is a list of questions which we can say have the highest association with the engagement index, or more simply, are the most significant influencers of employee engagement

i ROUNDING

Results are presented as whole numbers for ease of reading, with rounding performed at the last stage of the calculation for maximum accuracy.

Values from .00 to .49 are rounded down, whereas values from .50 to .99 are rounded up. Therefore, in some instances the data will not add up to 100%. Example below:

	Strongly Agree	Agree	Neither	Disagree	Strongly Disagree	Total
NUMBER OF RESPONSES	151	166	176	96	24	613
PERCENTAGE	24.63%	27.08%	28.71%	15.66%	3.92%	100%
ROUNDED PERCENTAGE	25%	27%	29%	16%	4%	101%
